

## Our line for sustainability

### Our line for sustainability

Article: **Jurga IFR Dimout green-line**  
Composition: **100% recycled** polyester made of PET  
IFR– standard: DIN 4102-B1  
Weight: ca. 260 gr/sqm  
With: 295 cm / also available in a with of 146 cm

### PET use

In order to be able to weave **1 rm** of this quality, approx. **36 x 1 liter PET bottles** have been recycled. So these bottles do not pose a problem to the environment by being depolluted on a garbish dump or the world's oceans.

A study of the Swiss Federal Office for the Environment in 2017 says that recycled polyester is almost equivalent in quality to newly produced polyester, but its production requires 59 percent less energy than this. WRAP (Waste & Resources Action Program) estimates that the production of rPET can reduce CO2 emissions by 32 percent compared to conventional polyester.

### Certification

This article is certified according to GRS standard in the preliminary steps. This gurantees that only used PET bottles will be used for the recycling process.
